**Model # 18853**

**U.S. Patents: 5,558,281 & 5,772,134**

This machine is capable of deforming spent cartridges, up to and including 5.56mm. beyond the point of reuse. (7.62mm can be processed in small metered quantities)

The deformer chamber contains M4 tool steel blocks hardened to specific Rockwell Scale. These are attached to a high speed revolving drum grinder.

The patented hammers strike the brass casings as they pass through the deformer chamber, resulting in mechanical deformation meeting demilitarization requirements.

- **Reduce Process Cost**
- **Decrease Process Time**
- **Effectively Demilitarize**

## Specifications:

- Power 220v three phase
- Processing Rate 500 -1,000 lbs./hr\*
- Conveyors 6" x 12'

\* Processing Rate is dependent on caliber of ordnance, (up to 50 cal.)
